## GenerLink - Remote Indication

When a portable generator is connected to the GenerLink, generator power will be connected to the home until the generator is shut off. During an outage, it is crucial to know when utility power has been restored so you can promptly turn off the generator. There are LEDs on the outside of the GenerLink that indicate the status of the power sources, but walking out to check these lights is inconvenient and potentially dangerous. Adding Bluetooth technology to your GenerLink allows you to know the status of your utility power from the comfort of your home. Choose between using our free smartphone app or our remote indicator box.

### Smart Phone App:

- Free GenerLink app on the App Store and Google Play Store.
- View the status of your GenerLink from your smartphone.
- Instantly receive a notification when utility power is restored.
- The range of Bluetooth technology depends on the phone being used and the environment. Estimated range up to 150 feet.

### Remote Indicator:

- Power on the device to view the status of your GenerLink.
- Instantly receive an audible notification when utility power is restored.
- Power Supply: 9-volt battery
- Enclosure dimensions: 1.5 in. x 2.5 in. x 4 in.
- The range of Bluetooth technology depends on the phone being used and the environment. Estimated range up to 150 feet.
