# EZ——Connect ORDER FORM

The EZ-Connect is a UL listed manual transfer switch that allows you to safely connect generator power directly to your home's breaker panel. This device works with portable generators (up to 48kW) that do **NOT incorporate GFCI protection**. Multiple inlet options are available to allow various sizes of generators to connect to the EZ-Connect. If your home does not have a main disconnect, add one to your EZ-Connect to ensure your home is **service entrance rated**. Add a power cord to ensure you have a reliable way to connect your portable generator to the EZ-Connect.
